## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest reference, Yamada et al. (newly cited US 2002/0067709), teach a TDMA communication system that assigns time slots to channels, wherein the system comprises: a data storage for storing a table indicating the state of a current available time slots in the frame; a priority database for storing a table indicating the priority of the time slot assignment; and a time slot management section for assigning time slots based on information in the assignable time slot database and priority database.

However, **regarding claims 1 and 6**, Yamada et al. fail to teach the claimed features of:

first data storage means comprising an  $n \times p$  memory block to store a time slot assignment (TSA) table which specifies for each bit position of the n-bit frame, the logical channel it belongs to at a given time, describing thereby the different time slots;

second data storage means comprising a  $N \times 1$  register to store status bits that indicates for each logical channel its status, "assigned" when it has a first value or "unassigned" when it has another value; and

logic circuit means connected to the first and second data storage means that enables or disables the transmission of the logical channel identifiers depending upon

they are "assigned" or "unassigned" to an output bus means for subsequent processing by a time slot assignor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAO SINKANTARAKORN whose telephone number is (571)270-1424. The examiner can normally be reached on Monday-Thursday 9:00am-3:00pm EST.
